

Le Duy Tien

Frontend web developer

Date of Birth: January 08, 2000, Vietnam

Nationality: Vietnamese

Address: Thu Duc, Ho Chi Minh, Vietnam

Phone: (+84) 329412620

E-mail: duytien0801@gmail.com

GitHub: <https://github.com/TienLD-0801>

LinkedIn: <https://www.linkedin.com/in/tienld>

Portfolio: <https://tienld-profile.vercel.app>

Languages: English - Vietnamese

Education:

2018 – 2022: Ho Chi Minh City University of Technology - Information Technology.

Skills:

Front-end:

- JavaScript, TypeScript, React.js, Next.js, Vue.js, Nuxt.js, Vite, Webpack, etc.
- HTML, CSS, SCSS, Tailwind CSS, Bootstrap, Material UI, Ant Design, Quasar, Vuetify.
- Microfrontend architecture.

Back-end:

- Node.js, Express.js, NestJS, Microservices, MongoDB, MySQL, PostgreSQL, REST API, API, GraphQL, Golang, Python.

Others:

- Git, UX design, Bitbucket, GitHub, GitLab, Docker, CI/CD, CircleCI, Firebase, AI workflow tools, PWA.

Work Experience:

2024 - 2025: BnK Solution - Senior Front-end Developer

2022 - 2024: Vitalify Asia - Front-end Developer

Projects: *(Selected recent projects only)*

10/2024 – 02/2025: AI-Powered Workflow Integration

- **Company:** BnK Solution
- **Responsibility:** FrontEnd Developer
- **Description:** Designed to streamline AI integration, this solution provides a low-code interface for building and deploying AI workflows. It enables seamless configuration of AI agents, retrieval mechanisms, and automation processes. By leveraging modular and scalable architecture, it allows for easy embedding into various applications, including chatbots, document processing, and intelligent decision-making systems. This approach enhances efficiency while reducing development complexity
- **Tech Stack:** React.js, TypeScript, Zustand, Chakra UI, ShadCN UI, Vite, PostgreSQL, Docker

- **Duties:** UI/UX design, development

10/2024 – 02/2025: Metadata Management with AI-Driven Tables

- **Company:** BnK Solution
- **Responsibility:** FrontEnd Developer
- **Description:** Implemented a flexible metadata management system using a structured table-based approach. This solution enables efficient data organization, retrieval, and processing while ensuring scalability and seamless integration into AI-powered applications. By leveraging a modular architecture, it supports dynamic data handling, facilitating structured storage and automated workflows.
- **Tech Stack:** Nuxt.js, TypeScript, Vue-Chart.js, PostgreSQL, Docker
- **Duties:** UI/UX design, developments

12/2024 – 02/2025: AI-Powered Data & Metadata Extraction for National Archives

- **Company:** BnK Solution
- **Responsibility:** FrontEnd Developer
- **Description:** An AI-driven system for extracting structured data and metadata from various archival documents, including scanned records, PDFs, and handwritten materials. The solution integrates advanced OCR, NLP, and knowledge retrieval techniques to enhance document digitization, categorization, and searchability. By automating metadata generation and content indexing, it improves archival management, accessibility, and long-term preservation of historical and governmental records.
- **Tech Stack:** React.js, TypeScript, Ant Design, Zustand, MySQL, Python, Docker
- **Duties:** UI/UX design, development

08/2024 – 02/2025: AI Document Extraction & Recognition & Signature Extraction

- **Company:** BnK Solution
- **Responsibility:** FullStack Developer
- **Description:** System for extracting structured data from various document formats, including images, PDFs, and scanned bank records or identification documents. The solution integrates advanced OCR and NLP models to accurately recognize and process text, form fields, and handwritten content. Additionally, it incorporates signature detection and verification, enhancing document authentication and security. This approach ensures efficient data extraction, improving automation and compliance in financial and identity-related applications.
- **Tech Stack:** React.js, TypeScript, Ant Design, MobX, Craco, NestJS, PostgreSQL, Microservices, Docker
- **Duties:** UI/UX design, development

06/2024 – 08/2024: Chat Bot AI for Banking

- **Company:** BnK Solution
- **Responsibility:** FrontEnd Developer
- **Description:** An AI-powered chatbot designed to assist users with banking-related inquiries, including account opening, transaction support, loan information, and general customer service. The system leverages NLP and intent recognition to provide accurate, real-time responses while ensuring secure data handling. Integrated with banking APIs, it enables seamless account management and guided interactions, enhancing user experience and operational efficiency.

- **Tech Stack:** React.js, TypeScript, Vite, Redux, Docker, Nginx, PostgreSQL
- **Duties:** UI/UX design, development

05/2024 – 09/2024: Temi Robot for Mall Monitoring

- **Company:** BnK Solution
- **Responsibility:** FullStack Developer
- **Description:** Robotic system utilizing advanced computer vision models to detect and respond to various scenarios within shopping malls. The robot autonomously identifies incidents such as forgotten items, fire hazards, malfunctioning lights, and overflowing trash bins. Integrated with real-time alerts and reporting mechanisms, it enhances safety, operational efficiency, and facility management. This solution improves proactive issue resolution, ensuring a smarter and more secure shopping environment.
- **Tech Stack:** React.js, TypeScript, MobX, Python, Django, Docker
- **Duties:** UI/UX design, development

04/2024 – 05/2024: Hanover Bot AI – Real-Time Human Activity & Voice Recognition

- **Company:** BnK Solution
- **Responsibility:** FrontEnd Developer
- **Description:** Integrating computer vision and speech recognition to analyze real-time human activities and interactions. Using camera-based detection, the system identifies movements, behaviors, and gestures of individuals in its surroundings. Additionally, advanced voice recognition enables AI-driven responses based on detected speech. This solution enhances automation, security, and interactive AI applications by providing real-time insights and intelligent decision-making.
- **Tech Stack:** Nuxt.js, TypeScript, Pinia, PostgreSQL
- **Duties:** UI/UX design, development

06/2023 – 02/2024: Blood Pressure Monitoring – Health Tracking

- **Company:** Vitalify Asia
- **Responsibility:** FrontEnd Developer
- **Description:** A healthcare application designed for hospitals to monitor patient blood pressure and medication schedules. The system records daily blood pressure readings, provides medication reminders, and offers real-time health insights. Built with Progressive Web App (PWA) technology, it ensures seamless functionality even without an internet connection, allowing offline data updates and synchronization once connectivity is restored. This solution enhances patient care, improves adherence to treatment plans, and optimizes remote health monitoring
- **Tech Stack:** React.js, Framework7, PWA, Firebase, AWS Lambda Functions
- **Duties:** UI/UX design, development

09/2022 – 10/2023: Online English Teaching Platform

- **Company:** Vitalify Asia
- **Responsibility:** FrontEnd Developer
- **Description:** Online learning platform for English education. The system provides interactive lessons, real-time video classes, and AI-driven language assessment. It includes personalized learning paths, pronunciation analysis, and grammar correction to enhance student engagement and track progress. With a user-friendly interface and seamless integration of educational resources, the platform enables effective remote learning and language improvement.

- **Tech Stack:** React.js, TypeScript, Framework7, Redux, Webpack
- **Duties:** UI/UX design, development

06/2022 – 08/2023: Giving Medicine to Children – Child Health & Medication Tracking

- **Company:** Vitalify Asia
- **Responsibility:** FrontEnd Developer
- **Description:** The healthcare monitoring system is designed to track children's health, medication schedules, and nutrition. The system provides automated reminders for medications and supplements, ensuring timely and accurate dosing. The system also records health records, tracks progress, and provides detailed information to parents and healthcare providers. With a user-friendly interface, the platform enhances pediatric healthcare management and promotes better adherence to treatment plans.
- **Tech Stack:** React.js, TypeScript, Framework7, Redux, Vite
- **Duties:** UI/UX design, development

04/2022 – 06/2022: Human Resources Management – Smart Employee Attendance & Payroll System

- **Company:** Vitalify Asia
- **Responsibility:** FrontEnd Developer
- **Description:** A comprehensive HR management system for employee tracking and payroll automation. The platform supports multiple check-in methods, including fingerprint scanning, facial recognition, online check-in, and location-based verification. It automates work-hour calculations, shift management, and payroll processing, ensuring accurate attendance tracking and compliance with company policies. With real-time monitoring and reporting, the system enhances workforce management and operational efficiency.
- **Tech Stack:** Vue.js (v2), Vuex, Quasar, GraphQL, Apollo client
- **Duties:** UI/UX design, development
